4 NEXT STEPS

Gateway Discussion

Caltrans project pushes all traffic to approach Campus from the north on Santa Theresa.

Additional water access on north side of Loop Road between two large trees.

All plants should be resistant to deer, turkeys, and pigs. Low maintenance is also a major plus.

Universal preference toward sign mid-slope with non-irrigated, drought tolerant plants.

Security is a concern. Rocks have been placed around Campus to deter people from driving onto and across the grounds.

Concern that drought-resistant plants will not survive or look brown all summer.

Spurlock to refine plant selection and explore adding in boulders.

Next Steps

Doug to coordinate Messaging Subcommittee meeting.

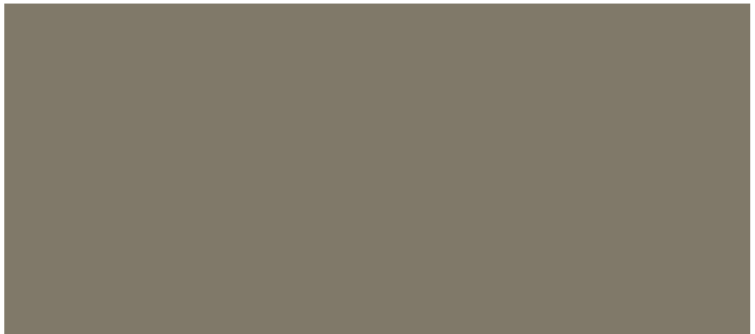

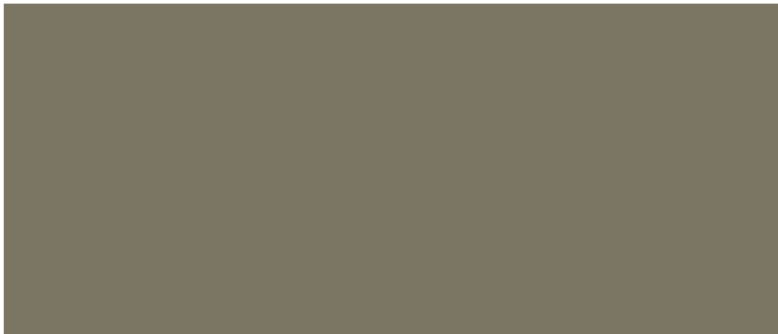

ICON/SYMBOL STUDIES
